SELF DECLARATION

03 December 2015

Ref.: Positive List for H&M Chemical Restrictions

Matex Bangladesh Limited is fully committed to the highest standards of product safety; through intensive analytical monitoring of chemical products we are actively supporting the objective of removing hazardous chemicals from the textile and clothing supply chain.

In the Zero Discharge of Hazardous Chemicals (ZDHC) Joint Roadmap, Version 2, ZDHC member brands are committed to define and develop a Manufacturing Restricted Substances List (MRSL) for the apparel and footwear industry. The ZDHC MRSL addresses hazardous substances potentially used and discharged into the environment during manufacturing and related processes, not just those substances that could be present in finished products. To align with this commitment H&M has formed the H&M Chemical Restrictions Positive List and is working closely with chemical suppliers to remove hazardous chemicals from their supply chain.

We, at Matex Bangladesh Limited read and understand the requirement of H&M chemical restrictions edition January 2016. In accordance with chemical restrictions of Part 1: Manufacturing Restricted Substances List (MRSL) & Part 3: Apparel/Accessories/Footwear/Soft Home Interior Products, we scrutinize our products based on our experience and typical application test under international standard laboratory. We declare that all the chemicals listed below would be complying with H&M MRSL and RSL (Part-1 & Part-3).

The lists below will be updated annually; incase changes are made which may influence the content of any restricted chemical; we will provide a new positive list. And validity of this declaration is subject to further recharge of H&M Chemical Restrictions Positive List.

This confirmation is only valid for H&M chemical restrictions edition: January 2016

With best regards
Matex Bangladesh Limited
